

## What are Wisdom Dialogues?

**Wisdom Dialogue** is a process of reflecting that we engage to generate greater agility and ability to derive value from the situations in which we find ourselves.

Perhaps you are facing a challenge that threatens your composure, equanimity, or something that you hold dear; maybe your question is one of clarifying the path forward, or perhaps you feel invited to understand yourself in new ways, these are circumstances ripe for **Wisdom Dialogue**.

**Wisdom Dialogues** begin with your indigenous intention and quickly open up to discover your own innate capacity to know the way through. The process is one of dialogic exploration, curiosity, and creativity which drives momentum towards a state of realized capacity. The truth of the matter is that you are already everything you need. Together, we will simply clarify your vision and ability to walk in wisdom and in beauty.

Perhaps most importantly, our process constitutes a very safe look deep into the mirror. I will help you take your own reflection, turn it back, and leverage it for resolving your own challenge, and more clearly revealing your own strengths and opportunities.

## What is the process?

Most often our engagement with the **Wisdom Dialogue** process begins with a **STAGES Assessment** and formal debrief session. (See related materials, attached or on our website for detail on this.)

Having dropped into the powerful **STAGES** perspective, we will have a tremendous foundation to explore, in real time, the most generative relationship you may form to the objects of your intention and concern.

On your initial intake questionnaire, we will have some foundational statements regarding your core questions, values, concerns, and perhaps even goals. Through the process of your Assessment and our debrief of that journey, your sense and intelligence regarding these things will begin to further deepen. This will empower us in collaboration to deliver the full value on this kind of reflective engagement.

By applying the process of **Wisdom Dialogues**, we will uncover hidden opportunities, allies, and help you to clarify your own deeper motivations and integrity. Oftentimes the process can feel profound at the beginning, but by the end you will tend to find you have realized your own self, capabilities and capacities in a way that feels familiar in a timeless sense.

As your counselor, it will be my role to guide you on a path of insight with integrity, an eye to the ethics of our journey together, and to safeguard your sense of safety and confidence throughout the process.

A typical engagement will last for three months with a formal **Wisdom Dialogue** once per month. The first month will also include the **STAGES Assessment** and associated conversation to debrief the results of that metric and your experience with it. After this initial phase you may opt to continue your engagement on an à la carte basis, checking in as desired to refresh and continue to build your own capacity for the ongoing **Wisdom Dialogue** unfolding within.

Feel free to schedule with us for an initial conversation at your leisure:
